

\$500 per month

Spring Special for iSeries Application Hosting

Do You Have:

- An RPG Software Package?
- Require 10 GB DASD and have 5 Users?
- Have No Third Party Software?

You could be in a state of the art data center with your applications hosted on an iSeries 525.

Specifications for \$500 per month fee:

- 5 Interactive user profiles, additional profiles will be charged a monthly rate of \$25 per user profile
- 10 GB of RAIDED disk, additional disk to be charged monthly rate of \$10 per GB
- 1 VPN tunnel
- 2 Client VPN
- Unlimited basic day-to-day security officer tasks may be accomplished via the provider help desk
- Weekday data backups (rotated weekly)
- Monthly full system backups (rotated annually)

With extensive experience in iSeries and AS400 administration, First Option monitors and maintains the availability and security of their client's IT systems in a hosted environment. First Option concentrates on their customers' most business critical areas and employs best practices to maintain the system with OS updates, patches, and the performance of scheduled routine maintenance tasks. Our data center is state of the art and SAS 70 Type II compliant.
